

Amfare

A modern cloud-based Reservation and Ticket management solution for intercity and shuttle bus companies

AMCO has developed this advanced platform to liberate ground travel operators and permit them to focus on their real goals that is to increase sales and profits, operate more efficiently and improve passenger's experience. Amfare is a secure, reliable, cost effective reservation and ticketing solution.

Amfare supports different sales channels, different ticket materials and smart card fare products, loyalty schemes, includes advanced inventory and revenue management modules. Operators are able to expand their 3rd party network by adding new resellers easily and fast.

Amfare offers an efficient booking flow which allows the passenger to choose easily his destination at the right price. From an operational perspective, this system is ideal for tracking accurate ridership and preventing fraud.
